Safe packaging solutions

for medical devices, dental, healthcare and laboratory

Packaging in the field of medical devices and healthcare today has to meet particularly strict requirements. The spectrum ranges from protection against mechanical damage and effective protection against contamination to double-sterile-barrier packaging for maximum protection against the ingress of germs.

rose plastic medical packaging specializes precisely in this. We not only develop and produce all our hard plastic packaging products ourselves, but also all the necessary molds.

We also develop tailor-made packaging solutions in close consultation with our customers.

So whenever you need high-quality, practical and secure protective packaging, you've come to the right place.

We will be happy to advise you on the many possible uses and advantages of our products.

Best wishes

Bernd Gerber

Managing Director
rose plastic medical packaging GmbH

International. Innovative. Ideal.

We are your flexible partner

rose plastic medical packaging specializes in the development and manufacturing of packaging for medical devices such as instruments, implants and accessories, as well as for healthcare, laboratory and diagnostic products.

With production facilities in Germany, the USA, Brazil, China and India, as well as sales offices worldwide, the company offers cleanroom quality in accordance with ISO 8 and ISO 9 as well as reliable service.

rose plastic medical packaging is a company of the rose plastic group. rose plastic is the world market leader in plastic packaging for precision tools. The company, headquartered in Southern Germany, has been known since 1953 for the development and production of innovative plastic packaging and its outstanding know-how in injection molding and blow molding.

Precise. Clean. Reliable.

In order to deliver the quality you need, we manufacture our products in state-of-the-art cleanrooms. We also ensure consistently high standards via our certified quality management system in accordance with EN ISO 13485.

Protective and transport packaging for sterile and non-sterile applications

To ensure we can supply clean packaging systems for your products, we manufacture within a strictly controlled environment that complies with cleanroom classification ISO Class 9 (EN ISO 14644-1) and ISO Class 8. In addition, our comprehensive standard product range is manufactured within the framework of EN ISO 9001.

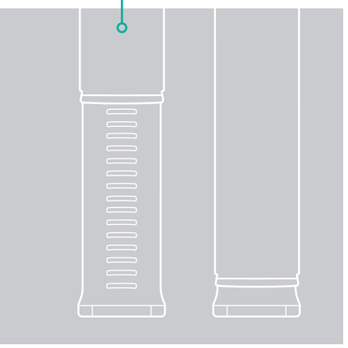
Our cleanrooms are located at our headquarters in Hergensweiler (Germany) and in California (Pennsylvania, USA). We also offer production in a clean environment at our location in Sorocaba (Brazil). Naturally, we use medical grade materials to meet our customers' exacting demands.
These include, in particular, common materials such as PETG, PE, PP and TPE.

We deliver certified quality – guaranteed!

At our location in Hergensweiler (Germany), rose plastic medical packaging is certified in accordance with the following international standards:

All from one source

From idea to finished package



1 The idea

DESIGN AND DEVELOPMENT

A good product is first and foremost based on a good idea that not only takes the customer's wishes into account, but also often exceeds them.
The experts in our highly efficient in-house development department take the design and construction of our packaging into their own hands right from the start. They and the proximity to our customers are the reasons for our well-designed, high-quality products.

2 The tool

TOOL SHOP

We produce our packaging using high-precision blow molding and injection molding tools. But who produces our tools? We also do this ourselves — from the design right through to CNC-supported production.
Because decades of experience have taught us the exact requirements for our production tools. Through the years, we have developed and integrated numerous special features that ensure superior process and product quality.

3 The tests

TECHNICAL CENTER

At our in-house technical center we put new tools to the acid test, carry out exhaustive production tests, and give valuable feedback to our development team and tool shop. Our colleagues in this department also perform exacting material tests and trials.

4 The series

PRODUCTION

Our packaging products only go into series production (injection molding and blow molding) once they have been fine-tuned and have successfully passed various tests and inspections.
We have also introduced numerous special features into our production process. These allow us to work with higher process reliability in order to achieve higher product quality, while ensuring economical production.

5 The logistics

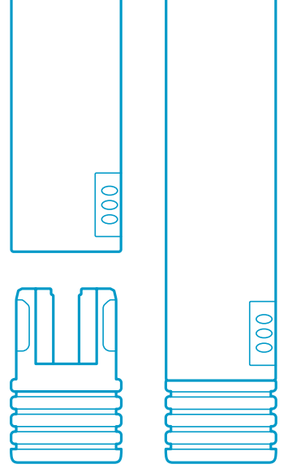
STORAGE AND SHIPPING

Our warehouses, which are designed for maximum capacity, and our experienced employees ensure that our products are well packed and reach you as soon as possible. Which in turn enables you to quickly deliver well-packaged products to your own customers.

Because we have all the essential process steps in our own hands, we have full control. This high vertical range of manufacture guarantees our customers a consistently high product and process quality.

rose plastic®

Where is our packaging in use?



Medical device

GREAT THINGS DESERVE EXCELLENT PACKAGING

Whether you need packaging for a delicate implant or surgical and medical instruments – rose plastic medical packaging can supply both primary and secondary packaging for a huge range of medical devices.

Dental

NO DRILL IS TOO SMALL FOR OUR PACKAGING

Whether you need packaging for dentistry supplies or dental technology, dental surgery or implantology products, all our packaging has one thing in common – it always meets the highest safety and quality standards. And the possible applications are incredibly diverse: Dental instruments, inlays, crowns, handpieces and contra-angle handpieces, drills and files – our well-thought-out packaging provides a safe home for almost everything.

Healthcare

THE PERFECT PACKAGING FOR YOUR HEALTHCARE PRODUCT

Even the best healthcare productstands or falls by the right packaging.. Here you will find a variety of packaging solutions that not only protect your product perfectly, but also present it in an appealing way.

Laboratories and diagnostics

NEATLY STOWED AND ALWAYS READY TO HAND

We help you keep order in the lab and workplace. We supply intelligent packaging solutions for the lab and diagnosis. Our range also includes the AQURADO® modular storage system.

STANDARD COLOR

UniCover

Flexible protective cover for different applications

- abrasion and puncture resistant
- great protection of the device surface
- suitable to gamma, ethylene oxide and eBeam sterilization
- protects sharp and sensitive medical instruments, implants, screws etc.
- UniCover is made of TPU (thermoplastic polyurethane). This material is characterized by excellent abrasion resistance and is suitable for various sterilization processes.
- intuitive handling thanks to "one-handed removal" feature also helps healthcare professionals save time when using it
- When closed, the packaged product is held inside the packaging by the closure studs. By applying lateral pressure in the area around these studs, the packaging is compressed, allowing the product to be removed.
- available with a cap on request
- internal geometry can be customized

UniCover sets new standards in terms of safety and user-friendliness.

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

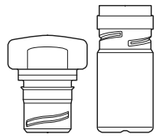
DentalImplantPack



Primary packaging for dental implants

- high quality single packaging for the protection of dental implants with and without implant mount
- the implant is clearly visible in the highly transparent packaging
- the implant holder fixes the implant and the cover screw firmly in the packaging
- simple handling adapted to the operation process
- easy and quick removal of the implant during the operation by the dentist
- by turning the cover on the implant holder, the implant lays free and can be directly picked up for insertion
- suitable for dental implants with Ø 2.8 - 6.5 mm and lengths up to 22 mm
- matching titanium inserts or the clamping on the implant mount prevent contact between plastic and implant
- the different diameters of the implants can be covered via a titanium ring, the titanium length stop can be flexibly adjusted to the implant length
- the rollaway protection integrated in the closure provides additional safety in the sterile operating area
- sterile barrier system possible with additional blister with Tyvek® or sterilization pouch

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

Easy handling, safe removal and flexible implant holding: the DentalImplantPack fully convinces.

PedicleScrewPack

Custom made primary packaging for pedicle screws

- high quality and stable single use package for polyaxial and monoaxial pedicle screws
- developed in cooperation with medical technology companies and clinical specialists
- optimum security and protection for product and end user
- packaging tube for safe removal of the screw using the attaching tool
- fixing of the pedicle screw by product-specific clamping inside the tube
- speedy efficient packaging
- speedy handling
- safe transportation

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

Product Range

Article	Description	Usable length	PU
PSP 60-3.2/1 C	short tube with individual clamping	60mm	upon request
PSP 110-3.2/1 C	long tube with individual clamping	110mm	upon request
PSP 27x21/1 B	cap	-	2000

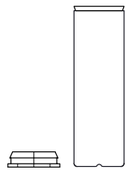
PACKAGING
Tube and cap are packed separately

MATERIAL
- PETG

PRODUCTION ENVIRONMENT
- cleanroom production

STANDARD COLOR

PlugPack



Round packaging tubes with end plug

- stable packaging tube with plug closure
- universal use for products of different dimensions
- square-shaped plug prevents rolling
- security and protection for your product
- speedy efficient packaging
- speedy handling
- safe transportation
- can be used as primary or secondary packaging

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

Oh so simple, oh so practical: universal packaging tube with the world's simplest closure (probably)

PACKAGING

Tubes and plugs are packed separately

MATERIAL

- Tube: Polypropylene (PP)
- Plug: Polyethylene (PE)

USABLE LENGTHS

35 - 330 mm

Ø DIAMETER

8 - 35 mm

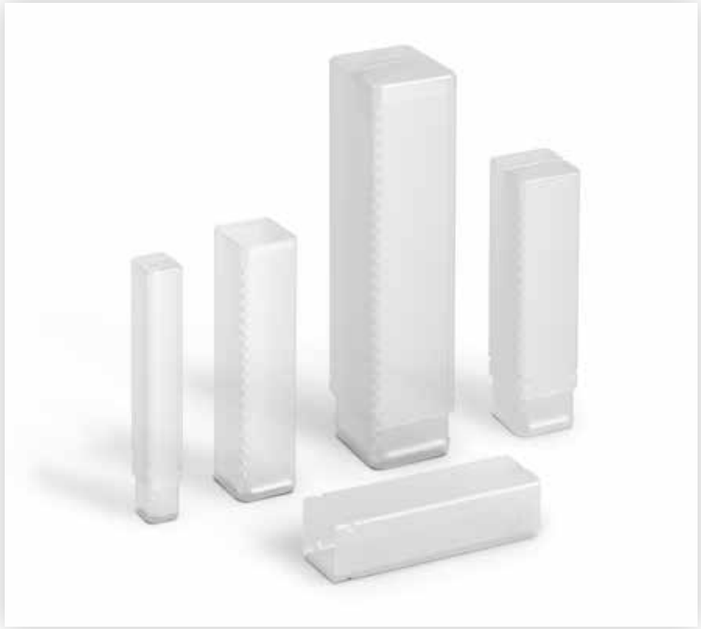
QuadroPack

Square telescopic packaging tubes with ratchet mechanism

- infinitely variable telescopic length adjustment
- universal use for products of different dimensions
- security and protection for your product
- speedy efficient packaging
- speedy handling
- safe transportation
- excellent for stacking and storage
- can be used as primary or secondary packaging



The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

Square, practical, easily closable – thanks to ratchet length adjustment. It's no accident that our cuboid multi-talent is among the world's best-selling packaging tubes

PACKAGING

Outer parts and inner parts are packed separately

MATERIAL

- Polypropylene (PP)

QP-G 78 150 with recessed bottom

QuadroPack TipLine

Protective packaging tubes for surgical instruments and applications

- square protective packaging tube with tapered ends
- optimum protection for long surgical inst-ruments and various other applications
- tapered ends reduce the risk of the content breaking through
- universal use for products of different dimensions
- security and protection for your product
- speedy and efficient packing of products
- safe transportation
- excellent for stacking and storage
- can be used as primary or secondary packaging

All the advantages of our QuadroPack – plus optimized protection for long surgical instruments and other applications

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

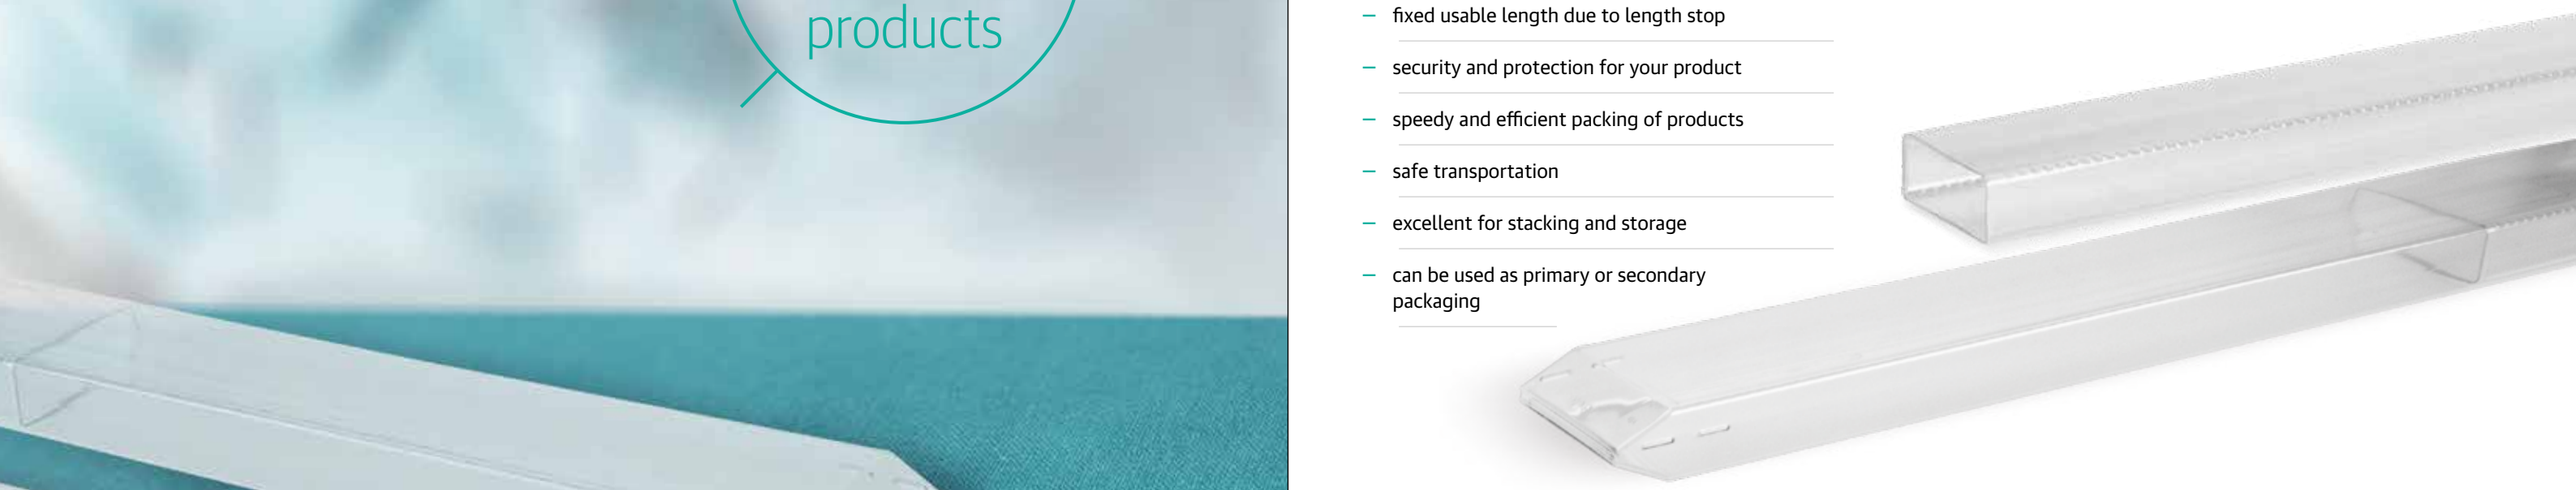
Rectangular Pack TipLine

Rectangular telescopic packaging tubes with tapered ends

- universal use for long products
- fixed usable length due to length stop
- security and protection for your product
- speedy and efficient packing of products
- safe transportation
- excellent for stacking and storage
- can be used as primary or secondary packaging



The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

Product Range

Inner part (I)	Outer part (A)	Ø	Usable length	PU (I)	PU (A)
RPTL 18x46/450 I	RPTL 18x46/382 A	18x46mm	869mm	upon request	100

The usable length describes the maximum internal length of the packaging.

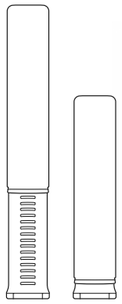
STANDARD COLOR



TelePack

Round telescopic packaging tubes with ratchet length adjustment

- telescopic length extension, ratchet mechanism locks package into extended position
- square end prevents rolling
- universal use for products of different dimensions
- security and protection for your product
- speedy efficient packaging
- speedy handling
- safe transportation
- can be used as primary or secondary packaging

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

The telescopic length adjustment was the inspiration for the name of this practical and versatile packaging tube – a sought-after classic in our product range

TipTube

Adjustable length package for bone nails with a bayonet locking feature

- high-quality, solid individual packaging for bone nails of various geometries (e.g. femoral, humeral, tibial)
- optimum security and protection for product and user
- secure positioning of bone nail
- minimal contact of packaging and bone nail
- easy handling due to bayonet lock
- secure handover of the packaged product
- can be used as primary or secondary packaging

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

This length-adjustable bone nail packaging provides optimum security and protection for product and user

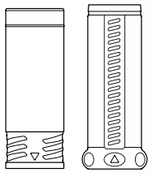
TwistPack Plus



More safety. More efficiency. The new generation of TwistPack packaging tubes convince with user-friendly twist lock closure

- maximum flexibility through universal length adjustment
- optimal product protection
- easy opening and closing through telescopic adjustment
- firm hold force through our click groove system
- hexagon tube bottom prevents rolling
- speedy handling
- safe transportation
- durable and reusable
- can be used as primary or secondary packaging

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

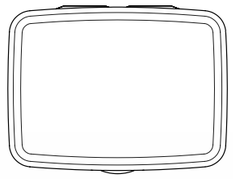
Consumer Box



Plastic boxes with hinged lid and integrated latch

- high quality image
- universal application
- polished lid surface provides high transparency for product visibility
- latch integrated into box contours
- durable hinges
- excellent surface for printing and labeling

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

Simply brilliant, brilliantly simple: This high-quality plastic box with integrated latch and polished lid surface is the perfect sales packaging

SplitPack

Multi-compartment packaging system with individual detachable units

- versatile packaging combining single unit with multiple packaging
- SplitPack: 2-part version with separate base and lid (SP 4x40 and SP 4x60 are one-piece version)
- SplitPack with shankholding: with integrated shankholding feature in lid
- detachable units make this product very efficient and user-friendly
- no packing and repacking of single items necessary
- each unit is reusable with hinged lid and snap-closure
- speedy handling
- excellent for stacking and storage

The only packaging we sell that's allowed to be broken. For safe transport and protection of multiple shank tools

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.

PACKAGING

Outer parts and inner parts are packed separately

MATERIAL

- Polypropylene (PP)

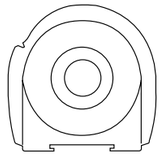
TapePack



Functional single packaging for kinesiology tapes with roll-off function

ROLL IT.
TAKE IT.
TAPE IT.

- high-quality, stable packaging especially for kinesiology tapes
- suitable for space-saving wall assembly by simply hanging onto a rail
- with roll-off function
- recessed grip on the one side, round label surface on the other side
- closure of the two half-shells by snap mechanism
- for tape rolls up to max. 70 mm diameter and 50 mm width

The proof of the suitability of the packaging in combination with the medical device to be packed must be provided by the manufacturer.
